

Product

The Hiveclass platform currently has two product offerings - one for libraries and the other for educators. The education product is created by physical educators and adheres to strict standards as set forth by SHAPE America. In addition to our digital content, this platform makes it easy for educators to not only implement the curriculum into their existing lesson plan, but also seamlessly keep track of student progress without adding to their workload. Our goal is to make quality physical education accessible to kids everywhere, but we also want to acknowledge the hard work that educators put in daily as they show up for their students, and make it easier for them to do what they do best - teach.

The screenshot displays the 'Volleyball Daily Progress' portal. It features a grid of progress indicators for four weeks: Week One - Passing, Week Two - Setting, Week Three - Serving/Hitting, and Week Four - Defense. Each week has columns for Monday through Friday. Students listed include Felix Ruhlhard, Jack Aranda, Jane Doe, Liz End, Percy Vere, and Rose Bush. Green dots indicate completed lessons, while red dots indicate incomplete ones.

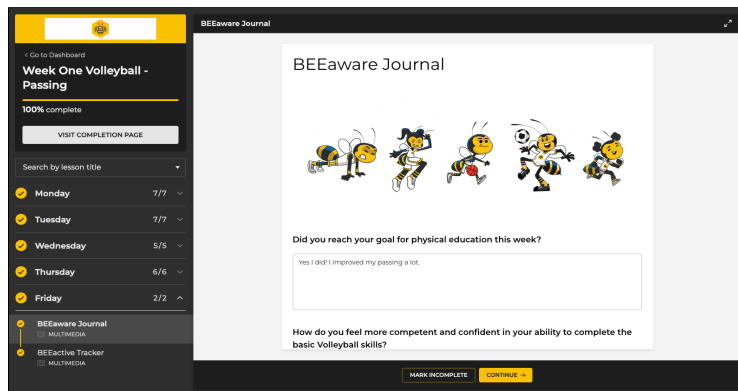

Teachers will see every student displayed in the Daily Progress Portal. A student who has completed a day's lessons will have a green mark in their row for that day. A red mark means that a student did not complete all of the day's lessons. Teachers can filter students based on what class they are in, and can select only particular students to display as well.

The screenshot shows the 'Weekly Progress' portal. It displays a grid of progress indicators for various units across different classes. The units listed include Volleyball and Soccer. Students listed include Felix Ruhlhard, Jane Doe, Percy Vere, Jack Aranda, Liz End, and Simon Sany. The progress is shown as a percentage of completed units for each student.

A student profile will only see their own progress. A teacher viewing the Unit Progress Portal will see which units their students complete, and for those units in progress, teachers will see a progress percentage reported.

The screenshot displays the 'Unit Progress' portal. It shows a grid of progress indicators for various units across different classes. The units listed include Volleyball and Soccer. Students listed include Felix Ruhlhard, Jack Aranda, Jane Doe, and Percy Vere. The progress is shown as a percentage of completed units for each student.

A teacher viewing the Weekly Progress Portal will see which of the weeks within a given unit their students have completed.

In addition to follow-along videos, our education platform provides thoughtful questions and an SEL component to keep students engaged. There are two options for teachers to view student responses. Teachers can either log in to a student profile and view responses lesson by lesson, or they can instruct students to download the course workbook at the end of the week's learning and send it to the teacher.
